### **Tug Rendezvous Position for Kwai Chung Bound Vessels**

Existing tug rendezvous position for Kwai Chung bound vessels situates at south of CRC Oil Terminal. The recent construction activities associated with the development of Terminal 9 have rendered the existing rendezvous location less than desirable. Furthermore, upon the completion of construction of Terminal 9 the layout in Kwai Chung basin would completely be altered. It would be necessary to identify a new tug rendezvous position that would cater for the present and the future environment.

2. This paper is to seek member's view on the location of a suitable rendezvous position.
